Inhalte	<p>The first decades of European Integration were a success story: Some 50 years after the Treaty of Rome the former European Community comprising 6 member states have emerged into today's European Union (EU) with 28 member states. EU-Institutions like the European Commission and the European Parliament have become increasingly important in the political decision making process in the EU. However, since the beginning of the 21st century the process of integration has become increasingly difficult. Especially the debt crisis in the Euro-area, the migrant crisis and the Brexit have revealed dissent concerning the status quo and future perspectives of the European Union.</p> <p>Key issues: EU Institutions, Single Market, Central policy areas, Future of the EU</p>
